TECHNOLOGY ENGINEERING
STEM
SCIENCE MATH
EXPO

SATURDAY, FEBRUARY 22, 2014 9 AM—1 PM

THE METRO SCHOOL - 1929 KENNY ROAD, COLUMBUS, OHIO

The STEM Expo is a free central Ohio community outreach event for students grades K through 8 that will feature fun, interactive activities and exhibits in the Science, Technology, Engineering and Math fields. The event is organized by the American Society of Civil Engineers as part of Engineer's Week with participation from many local companies and organizations. In addition to many hands-on activities, special exhibits will include Future City, Buckeye Current Electric Motorcycle, OSU Concrete Canoe and many more.

Students will also be able to tour Ohio State's Center for Automotive Research (CAR) facility, located next door to the Metro School, where Ohio State student projects such as the Venturi Bullet, Baja SAE, and Buckeye Current are developed along side cutting edge research in the automotive industry. Tours will begin at 11 AM and 12:30 PM and will last approximately a half hour.

Pre-Registration

Although registration is not required for the event, we ask that parents pre-register their child(ren) so our activity sponsors can better prepare for the expected number of attendees. To pre-register, please email STEMexpo@centralohioasce.com and include the name(s) and age(s) of your child(ren). Pre-registered students will receive a free take-home activity bag.
